Global

The iFRESH Taiwan (Institute of Food Research and Entrepreneur for Safety and Health in Taiwan) Since 2015. Our principal are promoting the Smart Supply Chain Platform for Foodstuff from agriculture, forestry, fishing, and animal husbandry. Applications of emerging AI technology for individual precision health, IOT for industrial manufacturing, and blockchain for supplying QA/safety management. The platform will include all steps from farmers to tables. Functional ingredients, food processing, packaging, designs, logistics, distribution, education, Information, patents, sublicense, regulations, certification, and website online shopping. Consumers can easily and precisely buy health food or nutraceuticals, that not depend on commercial advertisement but according to artificial intelligence and big-data from Food scientists. Furthermore, in response to international demands for environmental changes and energy conservation and carbon reduction, iFRESH will also comprehensively prepare for SDGs and assist and integrate the general health industry to implement ESG.

Institute of Food Research and Entrepreneur for Safety and Health (iFRESH)

The implementation of the Ministry of Science and Technology Industry-Academy Program is the driving force for the promotion. The alliance is composed of Steering Committee and Executive Committee, those are professors and experts from Taiwan Health Food Society and related fields across the country. The alliance integrates domestic health food materials and research technologies. Rigorous evaluation, the production "quality" and supply chain is soundly guided by the alliance, and then through the alliance to promote marketing and "brand" management, and to stimulate consumers' "stylish" interactive feedback, the three parties insist on working together.
